CHINESE RESTAURANT

中餐厅用杯精选

Turnover rate is an important indicator of a restaurant's profitability. But the higher the turnover rate, the higher the risk of breakage of tableware. LIBBEY's DuraTuff technology and world-leading one-piece process of wine glass can significantly improve the product's robustness and effectively reduce the breakage caused by table turnover and tableware cleaning during the operation. Less breakage means more profit.

Light-Bodied Red Wines 适用于轻质酒体的红葡萄酒

For these wines with fewer tannins and more subtle flavor, a large bowl and wide mouth allow the wine to breathe, enhancing delicate flavors.

Pair with Beaujolais, Pinot Noir, Sangiovese, Cabernet Franc

Full-and Medium-Bodied Red Wines 适用于中等酒体及重酒体的红葡萄酒

No. 4053 shown

These have the highest tannins resulting in complex flavors. A tall bowl directs the wine to the back of the palate for a richer tasting experience.

Pair with Bordeaux, Cabernet Sauvignon, Merlot, Malbec, Shiraz, Syrah

Light-and Medium-Bodied White Wines 适用于轻质酒体及中等酒体的白葡萄酒

No. 3050 shown

Perfect for lighter, more delicate white wines with less alcohol. A smaller bowl concentrates subtle aromas and directs the wine to the tip of the tongue for better appreciation of sweeter flavors.

Pair with Riesling, Moscato, Pinot Grigio, Pinot Gris, Petit Chablis

Full-Bodied White Wines 适用于重酒体的白葡萄酒

No. 3048 shown

For heavier wines with a fuller body, a wide bowl enhances complex aromas while directing the wine to the back of the tongue, heightening flavor intensity.

Pair with Chardonnay, Sauvignon Blanc, Gewürtztraminer, White Zinfandel

Champagne and Sparkling Wines 适用于香槟及起泡酒

No. 3796 shown

A tall, narrow glass maintains flavor concentration and displays effervescence, enhancing presentation.

Pair with Champagne, Prosecco, Lambrusco

Dessert Wines 适用于甜酒

No. 3964 shown

A smaller glass enables proper portioning of these higher alcohol wines. A rounded bowl directs the wine to the back of the mouth, perfecting the sweetness.

ENGLISH PUB

英式酒吧啤酒杯系列

Also known as English Pint Glass, it is commonly used for drinking English or Irish beers.

The pint glass has a slightly larger top, with a ring of protrusions near the mouth to help retain the foam and the odor for a longer time; it also prevents the glass from slipping, making it easier for drinkers to stand in front of the bar and drink.

Spirits Served Neat 烈酒净饮 / 纯饮杯

No. 1072B1 shown

A rounded design with heavy base is perfect for swirling “neat” drinks - unmixed spirits served at room temperature - to open up the flavors. The glass narrows at the top to concentrate and enhance the complex aromas.

Spirits Served On the Rocks 加冰烈酒杯

No. 15710 shown

The heavy weight and wide top are perfect for serving the finest spirits on the rocks, the large capacity allowing ample room for ice.

Brandy/Cognac 白兰地 / 干邑杯

No. 3705 shown

A wide bowl creates surface area to help evaporate the liquor and enhance flavor. The narrow top concentrates aromas, and the rounded bottom is ideal for cupping with your hand to warm the brandy.

Martini 鸡尾酒杯

No. 3733 shown

A very wide bowl allows for maximum aromatics (especially the juniper and botanicals in a gin martini). The glass can be held by the stem to prevent warming, and the cone shape keeps ingredients from separating.

Margarita 玛格丽特杯

No. 3029 shown

A Mexican cocktail made from tequila, orange liqueur and lime juice, margaritas are often rimmed with salt. The stem helps prevent warming the drink, and the very wide top enables an optimal salt-to-drink ratio.

Highball or Collins 海波杯 / 柯林杯

No. 2345 shown

This family of cocktails is made with a base spirit and a non-alcoholic carbonated mixer served with ice, requiring a tall glass for proper proportioning of ingredients.

Specialty Glassware 特饮杯

No. 3840 shown

Whether it's a signature mojito, frozen cocktail or premium Long Island Iced Tea, specialty glassware is designed to create a powerful presentation of the finest signature cocktails.

SPECIALTY & AFTER DINNER

Serving plates. Carafes. Pitchers. Salt shakers. These are the everyday essentials that complete your tabletop vision. Sure, they all have a job to do. But their primary role is to coordinate beautifully as part of a complete tablescape while providing functionality and durability.

Make a statement with custom decorating 用定制，助力品牌发声

One goal of food and beverage presentation is to make a lasting impression - to stand out in your customers' minds. With custom decorating, you can separate yourself from the competition and make an impression that lasts all the way to your customers' homes.

We'll fire your name and logo onto your glassware or dinnerware, creating a permanent visual impression that refuses to scratch, chip or wash off. It's an inexpensive way to add variety and spark to your beverage service, and it becomes a memorable, cost-effective advertising vehicle when used in "Keep the Glass" promotions.

HANDLING GUIDE

Handling Glassware For Safety And Profitability

One of most important merchandising tools used by the owner or operator to present meals and beverages to guests is proper glassware. To maintain the life of this investment, it needs to be treated and handled carefully. Improved handling means less breakage and damage, which translates into higher productivity and lower incidences of injury accidents. The tips included in this guide are designed to improve handling of glassware by reducing the most common causes of damage-mechanical shock and thermal shock.

1. Thermal Shock

Thermal shock is the result of glass experiencing a sudden temperature change. Glass holds temperature, and rapid change in temperature can cause enough stress to result in breakage. For example, a glass that has held ice cannot go directly into the dishwasher; a glass warm from the dishwasher should not go directly into service; and cold water or ice should not be put into a warm or hot glass or cup. In all cases, the glass needs to reach room temperature before being taken to the other extreme, and the thicker or heavier the item, the more time is needed. Cracks that result from thermal shock usually from around abrasions caused by mechanical impact, increasing the chances of breakage.

2. Mechanical Shock

Mechanical shock in glassware is the direct result of contact with another object, such as a spoon, a beer tap, another glass, or a piece of china. This kind of contact can cause a minute abrasion, invisible to the eye, but a source of weakness in the glass, making it more susceptible to breakage from impact or thermal shock.

When cleaning and wiping the stemware, please hold the bowl instead of twist the leg with force to avoid breaking.

General Handling

- Keep adequate supplies of glassware in order to prevent recently washed items from going directly into service.
- Place guides on scrap tables for busboys to place glass, china, and flatware in separate areas.
- Check dishwasher temperature twice daily.
- Replace worn glass washer brushes.
- Instruct busboys to BE QUIET. No one wants to eat in a noisy place. This will cut down on breakage of glassware, as well as help create a pleasant, quiet atmosphere.
- Never put cold water or ice into a warm or hot glass.
- Bus glassware directly into racks, or use divided bus trays with flatware baskets.
- Color code racks for different glass, china, and flatware items.
- Remove severely abraded glass from service.
